# Supporting the implementation and extension of PeopleSoft

## Supporting the roll out of the platform across the group since 2007

Succeed have been working with this supermarket chain since 2007, initially as part of the 9.0 implementation team, successfully implementing Peoplesoft HCM, Time and Labor, Absence Management and Global Payroll into all stores and head office locations.

During the implementation project we were appointed as the primary SI for the overall programme.

Since the completion of the 9.0 implementation into stores and offices, We were also engaged to extend the implementation to new acquisitions alongside distribution and manufacturing sites,

and their rapidly expanding convenience store brand. Alongside this rollout we were also appointed to manage the pension auto enrolment and RTI projects.

We were also retained to work with the company to support the definition of their HR systems transformation roadmap.

## Business situation

The customer wanted to consolidate their HR systems onto the Peoplesoft platform as part of an HR transformation strategy to help reduce the total cost of ownership and improve the functionality and stability of their HR systems.

## Solution

Succeed worked in partnership with the wider internal programme teams to deliver a resilient and scalable implementation of PeopleSoft HR and time and labour systems across retail, office, manufacturing and distribution environments.

This has enabled them to reduce the operating expenditure required to manage their HR systems estate and to centralise all of their core people data.

## Benefits of the Succeed solution

- Knowledge of HR best practice, process and systems
- Flexibility and Innovation
- Working in partnership with in house resources, providing Knowledge Transfer for support teams
- Unparalleled ongoing support and hardware hosting for PeopleSoft solutions

## Software and Services

PeopleSoft v9.0

Ongoing Support
