

**With over 20 years distilled HR technology experience, we are part of the AdviserPlus Group; a human resources technology business run by HR people. We work intimately within HR and payroll and know these processes from the inside out. This deep knowledge together with our reputation for excellence and continued customer referrals has been instrumental in the growth and success of our business. We are the trusted go-to payroll and time management implementation provider.**

## **PeopleSoft WorkCenters**

Want to save time and money with prioritised daily tasks, simple navigation and one-stop transaction processing for your users?

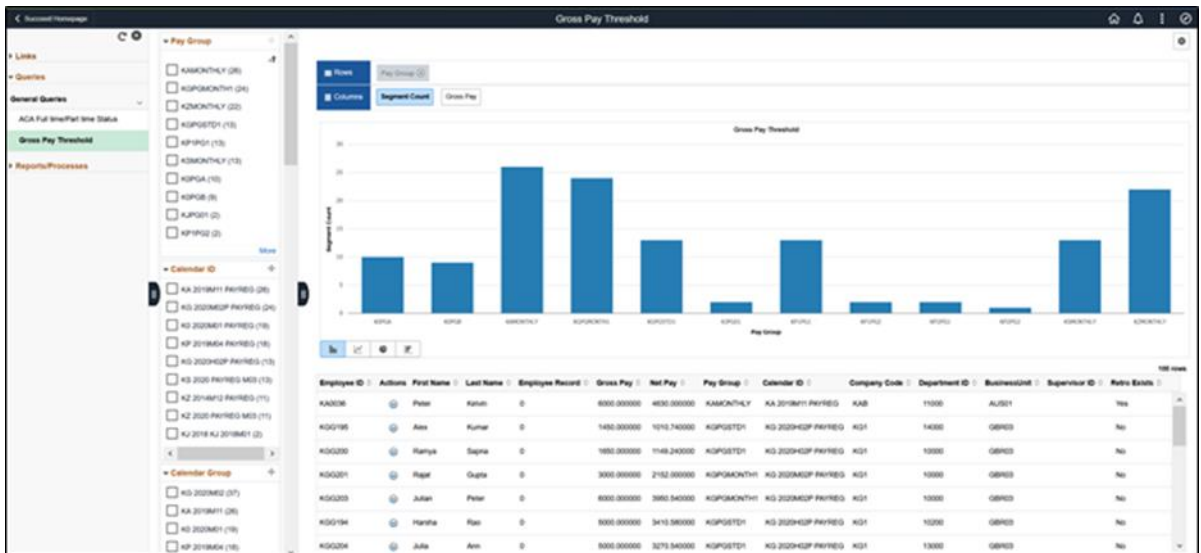

Want to take control of your application security with tools genuinely designed for Functional users?

At Succeed we can help streamline your teams' work areas into a unified 'one-stop shop', providing access to all day-to-day tasks within seconds of logging into the system.

Not simply task lists and pages - external links, system procedures / reports and visual analytics can all be overlaid onto a work area to provide structured, powerful and engaging content – all in the same place - that better informs decision-making and ultimately provides the ideal conditions for your team to thrive.

What's more, WorkCentres can be allocated using straightforward front-end tools. System Administrators can breathe a sigh of relief as the days of wading through years of built-up technical security administration are over – granting new access has never been easier!
